Web browser cookies

a) What is a Cookie?

A cookie is a small amount of data, which often includes a unique identifier that is sent to your computer, tablet or mobile phone (all referred to here as a "device") web browser from a website's computer and is stored on your device's hard drive. Each website can send its own cookie to your web browser if your browser's preferences allow it. Many websites do this whenever a user visits their website in order to track online traffic flows. Similar technologies are also often used within emails to understand whether the email has been read or if any links have been clicked. If you continue without changing your settings, we'll assume that you are happy to receive all cookies on the I14 NEWS website. However, you can **change your cookie settings** at any time.

On I14 NEWS websites, cookies record information about your online preferences and allow us to tailor our websites to your interests.

During the course of any visit to a I14 NEWS website, the pages you see, along with a cookie, are downloaded to your device. Many websites do this, because cookies enable website publishers to do useful things like find out whether the device (and probably its user) has visited the website before. This is done on a repeat visit by checking to see, and finding, the cookie left there on the last visit.

b) How does the I14 NEWS use cookies?

Information supplied by cookies can help us to understand the profile of our visitors and help us to provide you with a better user experience. It also helps us recognise when you are signed in to your I14 NEWS account and to provide a more personalised experience. For example, if on a previous visit you went to our education pages, we might find this out from your cookie and highlight educational information on your second and subsequent visits. The I14 NEWS uses this type of information to help improve the services it provides to its users. Certain areas of I14 NEWS websites may use cookies for a specific reason - for example, to help an online game work effectively on your device.

Additionally, I14 NEWS Worldwide uses cookies to serve some targeted advertising on i14 News.com to non-UK users. Further information, including how to opt-out of receiving these cookies, can be found in the "**What is Online Behavioural Advertising?**" section of Using the I14 NEWS.

c) Third party cookies in embedded content on I14 NEWS pages

Please note that during your visits to I14 NEWS websites you may notice some cookies that are not related to the I14 NEWS or the I14 NEWS's contractors.

To support our journalism, we sometimes embed content from social media and other third party websites. These may include YouTube, Twitter, Facebook, SoundCloud, Vine, Instagram, Pinterest and Flickr. As a result, when you visit a page containing such content, you may be presented with cookies from these websites and these third party cookies may track your use of the I14 NEWS website. The I14 NEWS does not control the dissemination of these cookies and you should check the relevant third party's website for more information. If you continue without changing your settings, we'll assume that you are happy to receive all cookies on the I14 NEWS website. However, you can find out about changing your cookie settings **here**.

Where the I14 NEWS embeds content from social media and other third party websites, some websites may use Google Analytics to collect data about user behaviour for their own purposes. The I14 NEWS does not control this. For more information, see the Google webpage "**How Google uses data when you use our partners' sites or apps**".

d) I14 NEWS cookies and how to reject cookies

Full information about how the I14 NEWS uses cookies, and how to control what cookies are set on your device through the I14 NEWS website, can be found on **Using the I14 NEWS** .

It is important to note that if you change your settings and block certain cookies, you will not be able to take full advantage of some features of I14 NEWS services, and we might not be able to provide some features you have previously chosen to receive.

e) Other information collected from web browsers

Your web browser may also provide the I14 NEWS with information about your device, such as an IP address and details about the browser that you are using. Where requesting local news or weather, it may be possible for you to choose to provide the I14 NEWS with access to your device's location through the web-browser. We use information provided by your browser or by the link that you have clicked to understand the webpage that directed you to I14 NEWS Online and this may be captured by performance cookies.

If you have any concerns about the way that we use cookies or respect your settings, then please contact us at **info@i14news.tv**.

Do Not Track (DNT) browser setting

DNT is a feature offered by some browsers which, when enabled, sends a signal to websites to request that your browsing is not tracked, such as by third party ad networks, social networks and analytic companies. This website does not currently respond to DNT requests.

Apps, Devices and TVs

When you download or use I14 NEWS apps on your mobile device or TV, information may be accessed from or stored to your device. Most often this is used in a similar way to a web browser cookie, such as by enabling the app to 'remember' you or provide you with the content you have requested.

Your web browser or device may also provide the I14 NEWS with information about your device, such as a device identifier or IP address. Device identifiers may be collected automatically, such as the device ID, IP address, MAC address, IMEI number and app ID (a unique identifier relating to the particular copy of the app you are running).

When you sign in to a I14 NEWS app, your sign-in details may be stored securely on the device you are using, so you can access other I14 NEWS apps on the same device without needing to enter your sign-in details again.

If you have any concerns about the information which might be accessed from or stored on your device by the I14 NEWS, you may wish to only access I14 NEWS content through a web browser and review your web browser settings. Visit Using the I14 NEWS ("**How can I stop my internet browser tracking my info?**") for more information.

Changes to the I14 NEWS's Privacy and Cookies Policy

This Privacy and Cookies Policy may be updated from time to time so you may wish to check it each time you submit personal information to the I14 NEWS. The date of the most recent revisions will appear on this page. If you do not agree to these changes, please do not continue to use I14 NEWS websites to submit personal information to the I14 NEWS. You can also delete your I14 NEWS account at any time – please see section 12 for details. If material changes are made to the Privacy and Cookies Policy, for instance affecting how we would like to use your personal information, we will provide a more prominent notice (including, for certain services, email notification of Privacy Policy changes).
